

# ORIAZ INNOVATION FOR GARDENERS

The Oriaz Bioclimatic regulator adapts the flow of water according to the weather. Watering increases with sunny weather and reduces on cloudy days. There is no need to use electricity or batteries.

The clever design means rain or river water can be used unfiltered, without any risk of clogging. Oriaz systems have a proven life expectancy of at least five years. Oriaz can be used for all your plants: house plants, succulents, shrubs, flowers or vegetables.

Drop full of micro-organisms getting out of the bioclimatic regulator. No problem!

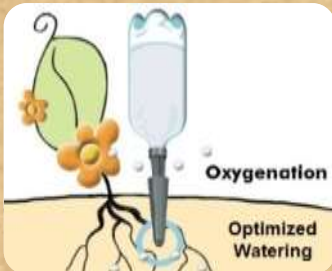

The Oriaz Solar Dripper fits a range of soft drink bottles, from 200 ml to 2 litres.

Bioclimatic regulator

Insertion cone

Thanks to the 12 cm long insertion cone (4.75 in.), water drips directly into the heart of the plant's root system. While the bottle remains perfectly stable on top, the roots are perfectly aerated below.

# ORIAZ Solar Dripper

The new Bioclimatic watering System  
Environmentally friendly and easy to use

- ✓ Trouble-free watering with so many benefits
- ✓ Use Oriaz for your house plants
- ✓ Enhance flowering and increase harvests in your garden
- ✓ Apply fertilizer easily at the center of the root system
- ✓ Outstanding Water Saving

**ORIAZ makes your life easier!**

*« I use Oriaz Growth in my garden. It enhances flowering and increases harvests.*

*I simply fill my bottles once to three times a week.*

*Thanks to the Oriaz patented Bioclimatic regulator the flow is adjusted according to weather conditions.*

*The Water Savings are unequalled and my plants look perfect! »*

*« I use Oriaz Holidays for my house plants. I fill my bottles only once or twice a month.*

*My plants look better and I actually have more free time. Having used Oriaz Holidays when I went away on holidays, the plants looked so good that I kept using Oriaz all year long.*

*There is no need to make a hole in the bottles. There is no mess and nothing tricky to do when it comes to filling the bottles either.*

*I apply fertilizers three times a year. »*

*« On my balcony, I use glass bottles to extend duration. »*

*« There is no need to filter rainwater as the dripper doesn't clog up. It is perfect for my plants because rainwater is full of beneficial micro-organisms and has no chlorine. I save a lot of mains water! »*

*The tomato plants reached 4.49 meters (14.75 feet) in the garden with an amazing yield.*
